

April 2008 NIVRA benoemt Total Solutions tot erkend opleidingsinstituut

Total Solutions delivers trainings covering the financial markets and her products since 2002. International well respected trainers specialized in the area to be covered, have been selected and committed to deliver first class quality training.

As a result, Total Solutions has built up an international network with top trainers, covering most subjects of the Financial Markets.

So far most participants to the trainings are working within Financial Institutes, ranging from specialized boutiques to Global Organizations. Last year, Total Solutions delivered her first training to the Dutch Chartered Accountants and the Dutch Chartered Controllers on an in-house basis.

Based on this in-house training and the top evaluation-ratings for the training, Total Solutions applied for an official recognition by the NIVRA (Dutch Institute for Chartered Accountants, <http://www.nivra.nl/>) and by that make it more accessible for Chartered Accountants and Chartered Controllers to meet their Permanent Education requirements (PE credits, internationally known as CPD credits).

In April 2008, the recognition by the NIVRA was approved and Total Solutions is allowed to directly award PE credits to the participants of our trainings.

Through the association of NIVRA with IFAC - the International Federation of Accountants, <http://www.ifac.org/> - these PE credits can be transferred into Continuous Professional Development (CPD) credits for Chartered Accountants registered in countries outside the Netherlands.

If you want to be kept informed about the upcoming Training Calendar, specific training areas or PE (CPD) credit related training, please contact us via training@nl.ts.eu.
